Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 6-8, 10, drawn to a first lithium ion cell, classified in class 429, subclass 217.
 - II. Claim 9, drawn to a second lithium ion cell, classified in class 429, subclass 231.8.
2. The inventions are distinct, each from the other because of the following reasons: the Group I cell includes a mixture of a cellulose ether compound and a butadiene copolymer rubber while the Group II cell does not include such mixture in the negative electrode.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different subject matter, recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
